

SUMMARY REPORT FT 950-I 2 1901 John FEBRUARY 1961

FOR RELEASE April 18, 1961

## MPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the drop in United States general imports (unadjusted for seasonal variation) from \$1,123.6 million in January to \$1,045.9 million in February 1 reflected decreases in imports from all areas as follows: Latin American Republics, from \$295.5 to \$282.3 million; Western Europe, from \$308.2 to \$295.2 million; Canada, from \$208.3 to \$197.8 million; and "all other countries," from \$311.5 to \$270.6 million.

The Bureau pointed out that from January to February, imports from 0.E.E.C. countries fell from \$300.0 to \$288.9 million and those from sterling area countries from \$176.2 to \$166.8 million. Decreases were reported in imports from all continents except North America.

Imports from Asia fell from \$196.8 million in January to \$167.8 million in February owing chiefly to a sizable drop in imports from Japan, from \$84.4 to \$61.7 million. The decrease in imports from South America, from \$224.6 to \$199.1 million reflected lower

On a seasonally-adjusted basis, total general imports were valued at \$1,121.6 million in February as compared to \$1,119.1 million in January. (See the February 1961 issue of Report No. FT 900-1.) Seasonally-adjusted data are not available by country of origin.

levels of imports from Colombia, from \$32.4 to \$20.1 million; Peru, from \$20.0 to \$13.7 million; and Chile, from \$21.2 to \$15.0 million. Imports from Europe fell from \$315.3 to \$299.3 million due mainly to decreases in imports from individual countries of this continent as follows: Greece, from \$6.5 to \$2.0 million; Italy, from \$29.1 to \$24.9 million; Denmark, from \$11.7 to \$7.6 million; West Germany, from \$69.2 to \$66.0 million; and Norway, from \$6.2 to \$3.2 million. However, imports from Belgium and Luxembourg rose from \$17.3 to \$23.0 million. A decrease in imports from New Zealand, from \$7.4 to \$4.0 million, largely accounted for the drop in imports from Australia and Oceania, from \$18.8 to \$13.6 million. Imports from Africa declined slightly from \$46.4 to \$43.5 million.

The slight increase reported in imports from North America from \$321.7 million in January to \$322.6 million in February resulted from increases in imports from some countries of this continent being largely offset by decreases in imports from others. The more noticeable of these counterbalancing changes were as follows: Mexico, from \$40.7 to \$49.5 million; Trinidad and Tobago, from \$5.3 to \$9.9 million; El Salvador, from \$2.1 to \$5.5 million; Canada, from \$208.3 to \$197.8 million; and Netherlands Antilles, from \$28.4 to \$23.4 million.

## EXPLANATION OF STATISTICS

COVERACE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in an number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consilidated. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude United States import duties. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: Formal entry shipments valued less than \$100 and informal entry shipments valued \$250 or less (less than one percent of total import value) are estimated by sampling. The estimated values are included in the area, continent, and country totals in the table. The variability in the import figures due to sampling is no more than three percent or less than \$50,000. For further information regarding the sampling procedures, see the "Explanation of the Sampling Procedure for Estimating Low Valued Imports" in the foreword of Report No. FT 110. The largest variation from rounding of figures is \$50,000.

Further information regarding coverage, country definition, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 110. For complete statement, see the foreword in Foreign Commerce and Navigation of the United States.

## UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: FEBRUARY 1961 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Figures for 1961 are as originally issued and have not been revised to include published corrections. Figures for 1960 include revisions published with the December 1960 reports, or earlier, but do not include revisions published during 1961. See "Explanation of Statistics" for information on sampling procedures and effect thereof on the data shown.)
